

*PMO Mobile is a specially designed smartphone application that allows you to use some of the functions of 'JSIS Online'. In case of emergency, for example, it is possible to request a cover certificate or direct billing from your smartphone. It is also possible to search for and enter a claim for reimbursement by taking a photo of medical invoices or certificates via the smartphone, without the need to scan them.*

*Other options exist for the Commission's active staff, but are of no interest to pensioners. This tool will evolve and will include other functions of the "JSIS online" or "Sysper Post Activity".*

*PMO Mobile is an application that requires no installation, can be accessed via any web browser on a smartphone and works well with the latest versions of the most common mobile operating systems (iOS or Android).*

*More information on the dedicated webpage : <https://aiace-europa.eu/tools/pmomobile/>*
