

Thank you very much 1st of all marked the 1st good step in the morning but we tried to do it better and 1st of all on behalf of the municipality of Lisbon welcome to our city. The city that gave the name to the current treaty of the European Union and of course for us Lisbon it's an honor to have your association with a huge event here in our city and what a moment to have these events when we are in when we have few days to the European elections and like their European commissioner as someone of the table mentioned before when a crucial times for Europe the 1st thing that you must and I have to underline is the importance of your work probably the overwhelming majority of Europeans citizens don't have idea that you each one of you at least once in our daily life as European citizens at their work of what you've done in the Brussels on other European institutions and it is crucial to understand many times European citizen don't understand how it works and but many of these works was made by you and in these days also by your colleagues that are working in the Europeans institutions and this is crucial for understands that your work is very important for us up her eyes as a ruffian citizens because I'm your arches citizen but also a proud European citizens but not a proud European citizen to live alone in the world's we don't want to make Europe great again we want to make your fair again and it is crucial because as you can see I'm a young guy so I don't have any idea well I have an idea but I didn't add the opportunity to see the Gasperi, the Schumann money or their open leaders but I sought to solve when François Mitterrand also meter high and Helmut Kohl gave their hands and I remember when them there the Berlin wall full dumb and this is crucial for us in these times when the people in European Union from the stony to portrait from island to Cyprus all across the 20 weeks countries and I mentioned 28 because I'm from the remain we must understand how important this is for our daily life I think we ever huge problem in these days in Europe we don't understand what is globalization we were crucial with the globalization in the world namely we Portuguese citizens in 50' in the 15th century but the world change the last and we know very well with our history yes our common history as Europeans what happened in the thirties and in the forties and this is a reason that we must understand the challenge that wearing freight in face of our future and the present future some days ago as survey in Austria mention that many people of their ocean citizens evenly over a good idea what happened 2nd World War is terrible because now we can see what is happening in across Europe fortunately not in Portugal but you can go to Spain share of the same word but let's forget the Spanish political party but whatever for example in Saturday in their in Milano well some people gather in the way to fight against Europe and they are more appealing today than they were before they want to be selected in euro by they gather and of course many people think now I am a politician I will not ignore for example what is happening now in France I have some friends from that political power and social soul I'm a social Democrat and the people do not understand what is happening now to in these days in France. The question is not left and right, the question is to be pro or against Europe and this is the point if you want to be a succeed as their opinion you Union would writes with values and which future with social rights for all the citizens no matter where the people come from No matter what they understand as a religion but with all the respect for all the citizens we must bet in European Union and this is why your association is crucial for us you have the experience you have the knowledge and above all you are europe citizens of course we don't we are not here to say to you forget you're not share ID national courts we want that you are proud of that but without this flag we will be more weak the future and look to the world in these days we are citizens of a country

of the continent's that always understand that the white people rule the world even with the republics or their monarchies but all change through to the arbiter yesterday to the US today while not so potential with the policies but look for example to India to China even to some countries not in these days in Latin [America, but](#) when they have a progressive policies they also can profit in the world's but if I took it [today](#) is a fight of what our founding fathers understand between 1945 and 1957 we must battle for the values of the human dignity we not only want the capitalism as a rule of the state we want as a part of the [society, but](#) not against the people without rights and without duties so for all of us of behalf of municipality of Lisbon once again have a good work but please say year fight for Europe because we deserve it as European citizens. Thank you very much.
